

BLUSTAR — Habit Tracker

Minimal User Manual

1. Start (Your Data)

Your data lives in a habits.json file you control.
Create a new file or open an existing one. Store it locally or in iCloud.

2. Daily Use

Open the app to see your habits.
Circle = current streak (green active, red broken).
Percentage = overall success rate.
Use Edit to reorder habits.

3. Mark Progress

Tap a day:

- 1× = Success (green)
- 2× = Failure (red)
- 3× = Skip (gray)

Gray days do not break streaks.

4. Bird's-Eye View

Tap the bird icon to view weekly progress across all habits.
Tap dots to update quickly.

5. Manage Habits

Filter: Active / Archived / All.
Edit mode allows bulk actions: Reset, Archive, Restore, Delete.
Sort by manual order or success rate.

Philosophy

Skip days freely. Focus on consistency, not perfection.
Your file is your backup and remains fully under your control.
